

It is all about Machine Learning – Senior researcher

Would you like to take part of the evolution of AI and Machine Learning and learn from the best in the industry? Do you appreciate mixing software product development with customer projects where you can apply your expertise in different contexts and develop touchless gesture solutions for the consumer electronics market and automotive industry? Then Crunchfish might be the company you are looking for. We are currently extending our AI/ML Team and is searching for an ML researcher talent.

About You

You have a master's degree in Computer Science, Physics or similar. Through your experience, you have a deep technical background and have worked in the field of computer vision for at least 5 years. You are efficient and able to do independent research. As a person, you are an open, positive team player that wants to contribute to a work environment that is built on engagement, openness and sharing knowhow.

We would like you to

- Have developed sharp commercial machine learning models and worked within the computer vision field.
- Intimate knowledge of common data science tasks such as classification, regression, data reduction, similarity matching and clustering.
- First-hand experience with modern machine learning techniques CNN, RNN, LSTM etc.
- Proficient with deep learning frameworks such as TensorFlow or PyTorch.

- Expert in Python development.
- Up-to-date knowledge of new research trends.

Extras you might have

- Image processing and data analysis
- Experience with C/C++ development

What's in it for you?

Working with Crunchfish is likely a great step in your career as you will be working hands-on in complex and fast-moving AI-projects together with sharp brains and access to market-proven software and tools. Our sweet spot is the combination of AI and computer vision, and as part of our team at Crunchfish, you will get to work hands-on with a variety of companies and industries - sometimes onsite - in the field of our expertise.

Welcome to Crunchfish

Headquartered at Media Evolution City, the hub for digital and creative industries in Malmö, Crunchfish is an expert in applying AI and computer vision to business problems. We specialise in computer vision, deep learning, data mining and AR/VR application development and provide our services in Sweden as well as Asia and the US.

Ready for the new challenge?

Reach out to Daniel Milesson, R&D Director at Crunchfish, via e-mail jobs@crunchfish.com
We will have interviews regularly with a last day for sending application on February 15th 2022.
