

It is all about Deep learning and Programming

Would you like to take part of the evolution of AI and Machine Learning and learn from the best in the industry? Do you appreciate mixing software product development with customer projects where you can apply your expertise in different contexts and develop touchless gesture solutions for the consumer electronics market and automotive industry? Then Crunchfish might be the company you are looking for. We are currently extending our development team and is searching for a software developer talent.

About You

You have a master's degree in Computer Science or similar. Through your experience, you have a deep technical background and have worked in the field of computer vision for at least 2 years. You are efficient and able to do independent tasks. As a person, you are an open, positive team player that wants to contribute to a work environment that is built on engagement, openness and sharing knowhow.

We would like you to have

- Developed SDKs within the field of computer vision.
- Intimate knowledge of programming languages such as C/C++ and Python.
- Passion for the quality of the software you design, deliver and maintain.
- Knowledge on documenting SDKs/APIs for external use
- Interest in AR/VR

Extras you might have

- Image processing and data analysis.

What's in it for you?

Working with Crunchfish is likely a great step in your career as you will be working hands-on in complex and fast-moving AI-projects together with sharp brains and access to market-proven software and tools. Our sweet spot is the combination of AI and computer vision, and as part of our team at Crunchfish, you will get to work hands-on with a variety of companies and industries - sometimes onsite - in the field of our expertise.

Welcome to Crunchfish

Headquartered at Media Evolution City, the hub for digital and creative industries in Malmö, Crunchfish is an expert in applying AI and computer vision to business problems. We specialise in computer vision, deep learning, data mining and AR/VR application development and provide our services in Sweden as well as Asia and the US.

Ready for the new challenge?

Reach out to us via e-mail jobs@crunchfish.com

We will have interviews regularly with a last day for sending application on May 31st 2022.
