

Application Security Engineer

Would you like to take part in shaping the future of Mobile payment? Do you enjoy proactively determine and fight the “unknown unknowns” out there? Then Crunchfish is the company you are looking for. We are currently growing our team and searching for an Application Security Engineer.

About you

You have a master's degree in Computer Science or similar. Through your experience, you have a solid technical background, an agile mindset and have worked with ethical hacking, threat modelling and penetration testing for at least 5 years. To be successful you need an open mindset with focus on collaboration and be quick to adapt to new circumstances. As a person, you are a positive team player that want to contribute to a work environment that is built on curiosity, creativity and care.

We would like you to have

- 5+ years of experience in application security domain
- Experience in security best practice in the software development lifecycle
- Software development experience (e.g. Swift/Kotlin/Java/C)
- Excellent communication skills

- Experience working in a cross-functional role driving product security
- Experience in assisting teams in reproducing, triaging, and addressing application security vulnerabilities

Extras you might have

- Experience with PKI
- Backend development

What's in it for you?

Working with Crunchfish is likely a great step in your career as you will be working hands-on in complex and fast-moving projects together with sharp brains and access to market-proven software and tools. Our sweet spot is in securing connections and payments between mobiles and as part of our team at Crunchfish, you will get to work hands-on with a variety of companies and industries worldwide with an initial focus in Sweden and India.
